Education

Birla Institute of Technology and Science Pilani — Goa, India
Bachelor of Engineering (Hons.), Computer Science ***CGPA : 8.80*** — *November. 2020 – July 2024*

Experience

Software Developer — Jan 2024 – Present
Commvault Systems — *Bangalore*

- Develop SDKs and full stack components for Commvault's Salesforce data protection product, using React, Java, and .NET across frontend, backend, and server-side layers.
- Built scalable enterprise solutions for SaaS platforms involving critical data protection, security and compliance metrics
- Apply AI-assisted development workflows to streamline code integration, testing, and delivery across application components while minimizing regressions.

Undergraduate Research Student — Aug. 2022 – May 2023
Data, Systems and High-Performance-Computing Lab, BITS Pilani — *Goa, India*

- Worked as a undergraduate research student under Dr. Arnab K Paul at DaSH Lab on projects in the domain of the distributed system and data optimizations

Projects

Salesforce Archive Preview | *Java, React, PostGreSQL, C++, XML* — Aug 2026 – Oct 2026

- Orchestrated the end-to-end creation of a solution to let customer preview their CRM data which would be archived from their workspace to a storage media, allowing them to keep track of all the relational hierarchies between their data before it is removed
- Engineered a robust technical solution using the existing Salesforce backup framework which involved creation of multiple threads, invoking Salesforce SOAP and BULK APIs, formation of internal graph structure and removal of cyclic edges to normalize data hierarchy, storage of this temporary data in PostGreSQL database, server side support to fetch and retrieve the data and display it on user interface

Adaptive Data Compression | *Zstandard* — Dec. 2022 – May 2023

- Led a project focused on enhancing compression algorithms' architecture, specifically optimizing Zstandard (zstd) to improve compression ratio, time efficiency, and memory optimization
- Undertook efforts to transform Zstandard (zstd) into an adaptive solution, addressing resource constraints while studying diverse compression algorithms' architectures

Skills

Languages: C, C++, Python, SQL, Java, XML
Tech Stack: JavScript, Node.js, PostgreSQL, MongoDB, MySQL, REST, .NET
Have completed over 900 questions on leetcode and a contest rating of 1700+
Soft Skills: Leadership, Team Structuring and Management, Budget Management

Position of Responsibility

Vice President — June 2022 – June 2023
Center for Technical Education, BITS Goa — *Goa, India*

- Served as the Vice President of the CTE BITS Goa, responsible for overlooking all operations related to managing all technical clubs and projects in college
- Managed and supervised core and crew of the department with overall strength of over 50 members across multiple verticals
- Successfully organized events like TechWeekend, conducted courses, hosted technical competitions and offered financial assistance to technical clubs and projects
